

DISINFECTION PORTAL

GENERAL SPECIFICATIONS

- Modular portal 2.5m high and 2m wide
- Stainless steel spraybars
- 16 high pressure fogging nozzles with anti-drip function
- Integrated controller
- Injection time adjustable
- Motion sensor detection
- Counter
- Tankcapacity for > 1000 injections

WATER SPECIFICATIONS

- High pressure system (80 bars)
- High pressure hydraulic hose connection between technical unit and portal
- Technical unit contains a 105l water tank
- Waterlevel detection
- High pressure pump
- Discharge valve
- Frequency controller flow rate

DIMENSIONS & WEIGHT

- length 620 mm
- Width 635 mm
- Height 1035 mm
- Weight 100kg aprox. (empty)

ELECTRICAL SPECIFICATIONS

- Voltage 1x230V 50-60Hz
